

**Dominique Bertrand** Program Manager  
**Karim Laaribi** Scientific Director

In order to be able to succeed in the Hospital and Health Management field, three values are needed: excellence, innovation and openness. The Master in Hospital and Health Management is naturally imbued with the values of ESA and revolves around them through a dual academic and professional approach.

### Involved Businesses

Hospital physicians, hospital pharmacists, responsible for cross-cutting programs (awareness, safety, quality, information system, planning, organization), hospital executives or close to clinical, medical and technical, technical and administrative services (A executives), managers and management team members of healthcare institutions, physicians or non-medical executives engaged in health oriented organizations (social protection...), executives of agencies or health institutions, etc..

### Objective

Forming professionals by allowing them to know the overall regulations of institutional and economic constraints burdening on the hospital system in order to assess the environment of decision making and complement their knowledge and skills which helps them develop or change their career within a healthcare institution.

### Program Architecture

A 3-phase program

|   |
|---|
| <b>Phase 1</b><br>3 Basic Education Units                             |
